

STEEL STACKERS

A MATERIAL HANDLING SOLUTION

WHAT ARE STEEL STACKERS?

Steel stackers offer a streamlined approach to material handling and storage. Built in our in-house manufacturing facility, steel stackers are customizable and a perfect solution for industrial automation due to their ability to stack heavy-duty and repetitive products. Steel stackers can store several cartridges of raw materials, including steel sheets, bulk packaged materials and pallets.

BENEFITS OF STEEL STACKERS?

- Manual Cartridge System
- Floor Space Optimization
- Increased Efficiency
- Safety Enhancement
- Cost Savings
- Efficient Workflow
- Safety Improvements
- Facility Optimization
