

INSTALLATION AND SERVICE WORK

SOLUTIONS IN ACTION

WHAT WE DO

Proper installation of equipment sets the foundation for the entire conveyor system. It ensures a safe, efficient and reliable system. With correct assembly and controls integration, your system will reach its full throughput capacity from day one.

Service and maintenance services protect your investment over time. Small issues like worn belts, misaligned rollers or sensor failures quickly lead to downtime. Regular service keeps your system running smoothly and extends the life of the equipment.

Solutions in Action has a team of skilled and technical professionals ready to tackle any installation or service projects on your radar.

OUR SERVICES

- Turnkey conveyor systems integration
- Installation of the following:
Dock levelers, overhead crane and Ibeam, mezzanines, modular portal buildings, flooring systems, racking, rack repair kits, safety nets, pallet wrap, floor and line painting
